

SYED FIRAS

Frontend & Mobile App Developer

Bhatkal, Karnataka, India | syedfiras06@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

SUMMARY

CS undergraduate (Class of 2028) and frontend/mobile developer with hands-on experience shipping production features across two startup internships and freelance client work. Comfortable across the full stack — React, React Native, Angular/Ionic, Node.js, and Supabase — with a track record of building real systems end-to-end: a school management platform, an AI-powered internship-matching tool, and a live gym management app for a paying client. Fast learner, ships quickly, and enjoys working directly with founders in small, high-velocity teams.

EXPERIENCE

Frontend Developer — Digiscrypt Technologies

4 months

- Built core modules of a school management system used to handle student records, attendance, and administrative workflows.
- Translated requirements into responsive, production-ready UI components, collaborating directly with the product/engineering team.
- Worked across the frontend stack to debug, optimize, and ship features under real release timelines.

Frontend Developer — OMNIMATE AI

2 months

- Built frontend features for an AI-powered platform that matches students with relevant internships.
- Implemented UI for AI-driven recommendation flows, working closely with a small team to iterate quickly on product feedback.

Freelance Developer — Independent Client Work

Ongoing

- Designed and built a gym management app for a gym owner end-to-end — member tracking, scheduling, and admin dashboard — using Ionic, Angular, Node.js, and Supabase.
- Owned the project from requirements gathering through deployment as the sole developer, managing a real client relationship and production data.

PROJECTS

IJESTM Journal Platform — React, Next.js, TypeScript

- Built a college journal website for AITM with advanced SEO tailored for academic publications and a research paper submission system.

GymNet Solutions Portal — Ionic, Angular, Node.js, Supabase

- Built a full gym management platform with member tracking, automated PDF invoice generation, an interactive class scheduler, and trainer training planners, backed by a Supabase real-time database.

Sahaya Women Safety App — React Native, Node.js, Express, Geofencing

- Built a safety app using geolocation to trigger one-tap emergency broadcast alerts, with active geofenced location updates and an offline emergency message fallback.

QR Code Cafe Ordering System — React, Node.js, Supabase, Tailwind CSS

- Built a café ordering web app with menu browsing, cart/checkout, and live order status tracking for baristas, responsive across tablet and mobile.

Auction Football System — React, Node.js, Supabase, WebSockets

- Built a real-time auction platform for football clubs to bid on player transfers, with countdown-timer bidding, Stripe payments, and live websocket notifications.

BIFA Football Club Manager — React Native, Node.js, NativeWind, Supabase

- Built a team management system for BIFA Football Club with a real-time player registration portal, dynamic match scheduling, and role-based admin dashboards.

SKILLS

Frontend: React.js, Next.js, TypeScript, JavaScript, HTML/CSS, TailwindCSS, Vite, Angular, Ionic

Mobile: React Native, NativeWind, Expo, iOS/Android

Backend: Node.js, Express, Supabase

Tools: Git, VS Code, Vercel, Render

EDUCATION

B.Tech. Computer Science — Expected 2028
